

Project development

The DigiComPass project, funded by the European Commission within the framework of the Erasmus+ programme, is moving forward with developing activities within the timeframe set by the approved project plan.

The newly formed consortium is developing a digital skills curriculum and certification using the Flipped Learning 3.0 approach. The curriculum is designed for different target groups, including adults, unemployed youth, students, students with special educational needs and immigrants. The aim is to develop a pathway that is adaptable to multiple target groups, while being inclusive and accessible, given the diverse nature of the audience.

Project meeting in Kalamata (Greece) Nov. 2023 – Multimedia Creation Training

The DigiComPass team across seven partner countries has worked to develop the five modules that will make up the course curriculum, modules that are based on the DigComp 2.0 guidelines. After building the methodological foundation based on FL (Flipped Learning), the phase of creating the learning content has begun, which will consist of textual and multimedia materials, while there is also a phase of ongoing review of the modules by the members. has begun and will continue with the pilot phase of the course.

The DigiComPass Association

In the meantime, the association associated with the DigiComPass project has been established (<https://www.digicompass.org/>):

The association is called the "Association for the Promotion and Development of the 'Digital Competencies Passport'", commonly abbreviated as "DigiComPass." It is a non-profit organization with no intention of making money. The association's activities are focused on:

Manage and further develop the training course "DigiComPass", which was created by the transnational project group as part of Erasmus+ Project 2022-1-CY01-KA220-ADU-000085965 and is offered as an Open Educational Resource (OER).

Promotion of the DigiComPass training course throughout Europe.

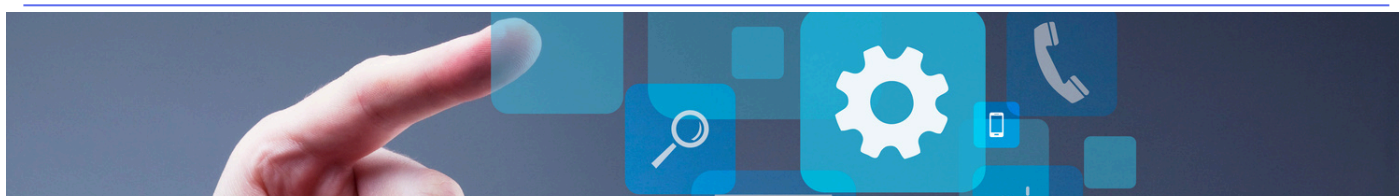

Facilitation of networking between members who hold the training course.

Provision of ongoing education to members and others interested in the aforementioned course.

Being a member of the DigiComPass Association offers unique benefits, including access to exclusive training materials and personalized learning experiences that enhance digital skills that are essential for the modern workforce. Members benefit from a supportive community of learners and opportunities for professional development through networking, partnerships, and targeted marketing campaigns. In addition, the association offers incentives such as certification upon course completion and trial memberships, making it an attractive option for adults looking to improve their digital skills.

Transnational project meeting in Trani (Italy) Apr. 2024 - Set up pilot test.

This association will be presented more extensively during the upcoming conference to be organized at the University of Cyprus, the project's lead institution:

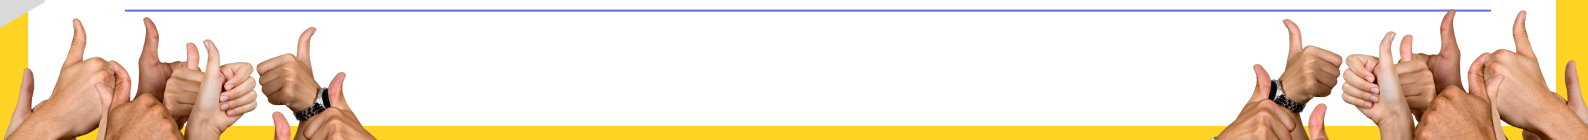

The DigiComPass Conference 2024 is the culmination of the DigiComPass Erasmus+ project and will be held at the University of Cyprus, Nicosia, between 27-29 November 2024.

The conference will provide delegates with an excellent opportunity to learn about the innovations of this project, specifically the implementation of the Flipped Learning 3.0 framework, which aims to improve the digital skills and competencies of adult learners.

Our keynote speaker is Errol St. Claire Smith (co-author of the Flipped Learning 3.0 movement), who offers a unique opportunity to gain invaluable insight into the workings and applications of FL 3.0. In addition, a select group of renowned global experts have been invited to give presentations and workshops on several related topics that will be of interest to educators at all levels, educators and researchers, including, but not limited to, AI and Flipped Learning, assessment, content creation, digital skills and vocational education.

The project and the activities implemented so far have been positively assessed by the Cypriot National Agency's interim report, which shows that the consortium is working in harmony and that the activities have been divided and shared in a functional manner to achieve the objectives within the set timeframe.

Updates will follow.
